SUMMARY

I am a seasoned health informatician with over 12 years of experience as a full-stack software developer. My extensive career spans the creation of robust applications for high-traffic enterprises within an agile framework. Proficient in Software Development, Database Management, Web Application Development, and Mobile App Development, I bring a wealth of expertise to the table.

My proficiency shines in back-end technologies such as C#, PHP, Python, and Java, complemented by mastery in frameworks like ASP.NET, Core MVC, and Laravel. My adeptness extends to diverse database technologies, including MySQL, SQL Server, PostgreSQL, and SQLite. On the front end, I am well-versed in a variety of technologies.

Recognized as a valuable team player, I possess the skills to efficiently organize and coordinate information and logistics. My intrinsic motivation and proactive approach infuse positivity into my work ethic.

SKILLS

- Data Analysis and Visualization
- JAVA, C#
- .NET CORE, ASP.NET CORE
- ASP.NET CORE MVC, ASP.NET MVC
- ASP.NET, Python
- PHP, APIs, WPF
- Xamarin Forms
- HTML5, CSS
- JavaScript, JQuery, AJAX
- Git, Github, ReactJS
- Advanced Excel
- Mobile App Development
- WordPress
- SQL
- MySQL, PostgreSQL
- SQL Server
- SQL Server Management Studio
- Microsoft Power BI
- DHIS
- Microsoft Access
- Microsoft Visual Studio
- EMR Systems–OpenMRS/NMRS, LAMIS
- TOMCAT
- Azure, IIS, APACHE
- Microsoft Word, PowerPoint
- OpenHIE- FHIR®, OCL
- Healthcare Terminology

ACHIEVEMENTS AND CERTIFICATIONS

- OpenHIE Academy 2023
  - Introduction to Fast Healthcare Interoperability Resources (**FHIR®**)
  - Introduction to Health Data Standards
  - Using and Implementing Terminology
  - Terminology
- **Philanthropy University** 2022
  - Planning for Monitoring and Evaluation (FHI 360 Instructor)
  - Data Collection, Analysis, Verification, Storage and Data Use (FHI 360 Instructor) 2022
  - Fundamentals of Project Management 2016
- **University of Oslo**
  - DHIS2 Fundamentals 2022
  - Data quality and Confidentiality 2019
- **SkillUP e-learning Certification**
  - Analyzing and Visualizing Data with Microsoft Power BI 2022
  - M&E Fundamentals 2020
  - Gender M&E 2021
  - Python Programming 2022
  -

EDUCATION

❖ Master of Science Degree in Computer Science (M.Sc. Computer Science)

Joseph Sarwuan Tarka University, Makurdi

2024

❖ B.Sc. Mathematics/Computer Science

University of Agriculture, Makurdi

03/2014, **Grade**: Second Class Upper

WORKING EXPERIENCE

❖ Health Informatics Senior Associate - Software Development

Center for Integrated Health Programs (CIHP) • Central Office, Abuja FCT

- January 2023 till date

Responsibilities

- Lead the design, adaptation, and maintenance of all systems facilitating the utilization of Data Repositories.
- Drive the optimization of internal data repositories to enhance mobile apps and innovative platforms for program support.
- Provide comprehensive support to program staff across state and central offices in utilizing databases for program implementation monitoring and result dissemination.
- Supervise NMRS data upload to NDR.
- Contribute as a Team Member in NMRS Mobile application development.
- Lead the development of CIHP's Clinical Data Repository (CDR).
- Lead the development of CIHP's Coolgirls mobile application.
- Contribute as a Team Member in Jolly95 mobile application development.
- Act as the IP focal person for TB PROTECT data entry into the EMR.
- Coordinate and facilitate training sessions on data management and analysis tools, including visualization dashboards, mobile applications, and MS Office products for team members.
- Supervise the deployment of electronic information systems to new sites, ensuring smooth implementation.
- Coordinate and review data collected and reported, identifying and addressing issues related to data entry errors, integrity, and concurrence.
- Ensure developed software and database tools align with reporting requirements for both internal and donor/Government of Nigeria (GoN) use.
- Enhance the organization's Research and Public Health Evaluation activities in Nigeria by optimizing data analysis processes for generating advanced insights from existing program data.
- Provide technical assistance for systematic data analysis of outputs from electronic information systems.
- Collaborate on the development and adaptation of mobile applications to support program implementation, leveraging existing platforms.
- Undertake routine monitoring visits to project sites utilizing electronic information systems, troubleshooting Health Informatics (HI) and EMR (Electronic Medical Record) challenges, and ensuring effective resolutions.
- Ensure complete backup and archiving of codes, Standard Operating Procedures (SOPs), and guides for all databases and applications.
- Participate in DQA exercises.

❖ Health Informatics Clerk

APIN Public Health Initiatives • Benue

- 11/2020 – 01/2022

Responsibilities

- Managed the Electronic Medical Record (EMR) database, ensuring its smooth operation and integrity.
- Captured all clients with the Patient Biometric Identification System (PBS) for accurate identification.
- Executed routine updates on the EMR, adhering to DATIM (Data for Accountability, Transparency, and Impact Monitoring) and NDR (National Data Repository) standards to maintain data quality.
- Ensured accurate and up-to-date Enrolment and Antiretroviral Therapy (ART) Registers within the EMR.
- Collaborated closely with the M&E (Monitoring and Evaluation) / Records Officer to support data demand and utilization efforts.
- Generated quarterly line lists for viral load eligibility and XML files, along with HTS (HIV Testing Services) line lists.
- Worked in conjunction with M&E officers to ensure data consistency and synchronization using M&E indicators.

❖ Head of Software Development

Sysmax Technologies Limited • Makurdi, Benue

- 01/2017 - 12/2020

Responsibilities

Leadership and Software Development:

- Led and managed the Software Development and IT teams, ensuring the delivery of user-centric software, infrastructure, and architecture.
- Oversaw the planning, design, and updates of software databases.
- Conducted research, design, implementation, and management of software programs.
- Collaborated with team members to conduct root cause analysis, review code, and perform unit testing.
- Evaluated and tested new programs to ensure quality and effectiveness.

Technology and Methodology:

- Guided technology and methodology decision-making within the team, promoting system architecture standardization, reusable code development, and best practices.
- Wrote and implemented efficient code to enhance software performance.
- Identified areas for program improvements, developed modifications, and conducted testing and maintenance.
- Analyzed user requirements and translated them into comprehensive design documents.

Collaboration and Architecture:

- Collaborated with cross-functional teams and users to evaluate technology platforms suitable for delivering company products and internal services.
- Led the design of product architecture based on study of use cases or user stories.
- Maintained organization-wide adherence to technology standards and best practices.

Projects Accomplished:

1. Designed and architected the database schema for the school portal of Plateau State University, Bokkos.
2. Led a programming team in the successful development of the PLASU school portal.
3. Headed a software development team to create a comprehensive web application for school management and result processing.
4. Individually developed an efficient Hospital Management Software.
5. Engineered an advanced ERP web application.
6. Created dynamic websites catering to diverse organizations.
7. Devised an effective inventory management software.

❖ Program Officer

INTER-GENDER DEVELOPMENT CENTER • Plateau, Jos

- 09/2015 – 09/2016

Core Responsibilities

- Proactively identifying and reaching out to potential grantees to secure funding.
- Formulating and implementing best practices to enhance the overall performance of programs.
- Conducting thorough program reviews and meticulously preparing insightful reports for management.
- Methodically planning and executing program activities, ensuring precision and timeliness.
- Cultivating new program partnerships to drive business expansion.
- Assisting in budget preparation and skillfully managing expenses for programs.
- Effectively representing the company's brand during industry conferences, meetings, and workshops.

❖ General Manager

Doomex Computer Links • Adikpo, Benue

- 03/2014 - 11/2015

  Responsible for allocating resources to support competitive strategies, solving business problems and organizing business concepts or principles.

❖ Web Application Developer

Web Palace Computer Institute • Abuja, FCT

- 02/2010 - 06/2012

Responsible for designing, developing and maintaining internal and external web application/websites for organizations.

TRAININGS AND WORKSHOPS ATTENDED

- NMRS Metadata development review workshop @CCFN HQ Abuja | Nov. 2023
- NMRS Terminology/Concept Mapping @PHIS3 office, Abuja | July, 2023
- NMRS Enterprise Installation and Repairing a Crashed Database; APIN Public Health Initiative | Feb 2021
- Intermediate MS excel functions such as vlookup and pivot tables; APIN Public Health Initiative | Feb. 2021
- NMRS HTS Data Review, review of HTS line listing (EMR-NDR concurrency check); APIN Public Health Initiative | Feb 2021
- Data security and confidentiality/policy and backup ethics; APIN Public Health Initiative, Makurdi | Nov. 2020.
- LIMS -EMR Interoperability on NMRS; APIN Public Health Initiative, Ukum | Nov. 2020
- Overview of NDR, understanding NDR errors; APIN Public Health Initiative, Ukum | June 2020
- Commodity Management Module usage and data entry; APIN Public Health Initiative, Ukum | July 2020
- NDR-EMR concurrency check, reviewing XML files generation and extraction errors; APIN Public Health Initiative, Ukum | Aug. 2020
- Engaging Communities for Peace in Nigeria; Inter-Gender Development Centre, Jos - Abuja 2015.

Personal Projects Accomplished

1. E-commerce platform (***Available on Google Play Store (*Xamagos*) – www.xamagos.com***
2. Hospital Management Software
3. Computer Based Test System
4. Animals diseases, diagnostic and prescriptive system
5. Hotel booking and reservation system
